There will be a field work day on May 13th starting at 8:00AM. The field will be closed until the work is done. What we want to accomplish is to tear down the shed, mow and weed whack, repair roof on picnic area, and patch the N-S Runway and move the mid-runway take off signs.

10) Safety Report – Chuck Brant, Vice President & Safety Officer

Please make sure that you put your card in the correct frequency slot and make doubly sure that when you pull a card that it is YOUR card. We have had a couple of incidents where pilots have put their card in the wrong slot, usually right next to the correct one, or have pulled someone else's' card in the slot next to theirs. Please be double careful with the frequency board operation.

11) Field Acquisition Report – George Kerr/John Neumeier

We are still trying to find a mutually agreeable time to get with the state to look at the land they have set aside for us 12 miles East of our current field. We do not know when this will happen, but will report when it does.

It is extremely important to the future of the club that we support the Arapahoe County Fair and have a good showing. We can not say any more about it at this point.
